Illustrated Mementos of People, Places and Celebrations

Celebrations

Celebrations are times when you gather together with your family, friends and the people who mean something to you to enjoy a wedding, birthday or special occasion. It's a time to enjoy the good things around you with special people.

I can create a visual memento of your event telling the story of the day as something to be treasured by yourself or others and kept as a keepsake.

I sketch anything I see: beautiful venues, stunning table decorations and flowers, guests chatting and dancing, impressive wedding cakes, late evening nibbles, classy hats and outfits, and those special individual touches you have chosen. I work unobtrusively, moving around the venue watching, observing and drawing.

Using an iPad or a sketchbook with pen/ink/ watercolour, I can potentially create around 40 or more unique images of anything I see. I am like a photographer who draws instead of taking photos, capturing the people, scenes and vibe of your event.

The illustrations can then be presented as:

- a presentation hardback book
 - digital images
 - original sketchbooks used

My work could form a gift given as a present by family members or a group of friends.

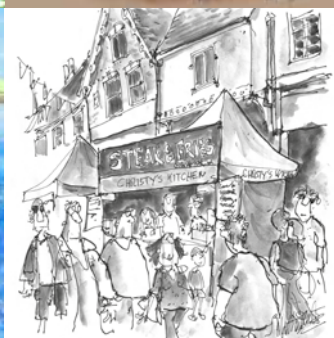

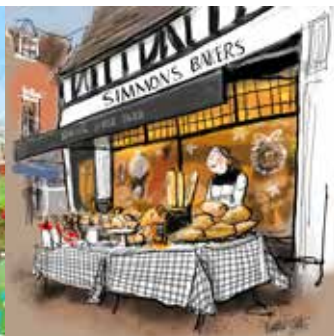

Your celebration could be a:

wedding
birthday
anniversary
work celebration
family gathering
garden party
seasonal event

My sketches are not caricatures/portraits created as entertainment or favours for guests on the day.

Below: other sketch/illustration examples

Places

Places are where you find yourself for a particular time or season. It may be your home, garden, farm, business, town or some other place. It is somewhere special and meaningful to you.

I can create a visual memento of your place, through a varied collection of illustrations, as something to be treasured by yourself or others, kept as a keepsake or passed on to future generations. It will tell a story, either of a moment in time or as an unfolding story over a period of days or months.

I describe my work as being like reportage, in that I can capture people, scenes and places in a form of visual documentary. Using a variety of illustration techniques over multiple sketches and illustrations, I will capture as much of your place as I can in a unique portfolio of creative work.

I draw using traditional pen and ink techniques and also digitally on an iPad. Some pictures will be quick 'live on location' sketches capturing particular people, scenes or moments as they happen. Others could be longer, more detailed works.

The illustrations can then be presented as:

- a presentation hardback book
 - digital images
- original sketchbooks used

Your place could be a:

- family home and garden
- favourite place to visit and relax
- town or village
- farmhouse, buildings and associated farm life
- favourite landscape
- work environment and its people/processes

f: Wedding Sketch Artist

Any wedding fairs or shows
I'm attending are given
on my website.

Working live means I can create original artwork instantly.
I do not use AI to help me draw my images.
